

JOURNAL OF MARINE ENVIRONMENTAL ENGINEERING

<http://www.oldcitypublishing.com/JMEE/JMEE.html>

EDITOR IN CHIEF

Dr. Michael S. Bruno

Davidson Laboratory, Stevens Institute of Technology, Castle Point Station, Hoboken, NJ 07030, USA

e-mail: mbruno@stevens-tech.edu

ASSOCIATE EDITORS

Dr. Albert J. Williams III

Applied Ocean Physics and Engineering Department, Woods Hole Oceanographic Institution, Woods Hole, MA 02543, USA e-mail: awilliams@whoi.edu

Professor Iver W. Duedall

Department of Oceanography, Ocean Engineering and Environmental Science, Florida Institute of Technology, 150 West University Boulevard, Melbourne, FL 32901, USA e-mail: duedall@fit.edu

EDITORIAL BOARD

Dr. A. J. Elliot, University of Wales, UK; **Dr. Frederick Grassle**, Rutgers University, USA; **Vagner Jacobson**, Danish Hydraulic Institute, Denmark; **Dr. Quamrul Ahsan**, HydroQual Inc., USA; **Dr. Scott D. MacKnight**, OCL Services Ltd., Canada; **Professor Ole S. Madsen**, Massachusetts Institute of Technology, USA; **Dr. Ram K. Mohan**, Blasland, Bouck & Lee, Inc., USA; **Michael Muntisov**, Gutteridge Haskins & Davey, Australia; **Dr. Donald C. Rhoads**, SAIC, USA; **Professor Friedrich Schott**, Institut für Meereskunde an der Universität, Germany; **Dr. D. A. Trivett**, Dalhousie University, Canada; **Dr. Helen T. Yap**, University of the Philippines, The Philippines

Rhoads**, SAIC, USA; **Professor Friedrich Schott**, Institut für Meereskunde an der Universität, Germany; **Dr. D. A. Trivett**, Dalhousie University, Canada; **Dr. Helen T. Yap**, University of the Philippines, The Philippines

CALL FOR PAPERS

The editors of the *Journal of Marine Environmental Engineering* invite your contributions.

Detailed notes for contributors can be found on the reverse side of this flier.

The primary aim of the *Journal of Marine Environmental Engineering* is the dissemination of technical information among scientists working on marine environmental problems. The journal is unique in both its interdisciplinary nature and its focus on applied science and engineering. Articles will describe engineering solutions to existing environmental problems and as a result, the *Journal of Marine Environmental Engineering* provides a vehicle for the publication of papers not normally found in traditional development orientated journals. The scope of the journal includes, but is not limited to, those scientific and engineering disciplines addressing complex environmental problems in ocean and estuary waters and inland seas. Topics covered include laboratory and computer modelling of ocean currents, waves, transport processes and offshore coastal structures, field measurements of ocean properties and dynamics and ocean instrumentation design, and their applications to marine waste disposal, ocean outfalls, habitat enhancement and creation, non-point pollution analysis, fisheries management, dredging, beach erosion, oil spill prevention and remediation, and aquatic toxicology.

Papers submitted for publication must be in English and must follow a prescribed format. All papers will be subjected to a critical peer-review prior to publication.

SUBSCRIPTIONS

The *Journal of Marine Environmental Engineering* publishes four issues per volume. Subscriptions are renewed on an annual basis.

Institutional: US\$695 • EURO €444 • ¥76,372 **Individual:** US\$149 • EURO €119 • ¥19,859

ISSN 1061-026X (print) • 1029-0427 (on-line)

For more information, a sample copy, or to subscribe, contact:

Old City Publishing, 628 North 2nd Street, Philadelphia, PA 19123, USA

tel: +1 215 925 4390 • fax: +1 215 925 4371

Enquiries can also be sent by e-mail via a link on the publishers website: <http://www.oldcitypublishing.com>

Notes for Contributors

Journal of Marine Environmental Engineering

In order to ensure timely handling of manuscripts, contributors are encouraged to read these instructions carefully before preparing a manuscript for submission, and to check the manuscript for compliance with these notes before submitting it for publication.

Submission of Manuscripts

Please submit three copies of your manuscript to Dr. Michael Bruno, Editor in Chief, Davidson Laboratory, Stevens Institute of Technology, Castle Point Station, Hoboken, NJ 07030, USA.

Manuscripts may also be submitted as a single complete attachment with a cover e-mail indicating that the article is being submitted for publication in *JMEE*. E-mail submissions should be sent to Dr. Michael Bruno at m1bruno@stevens-tech.edu.

Please include *complete* postal addresses, e-mail addresses, and telephone and fax numbers for all authors of the article.

The preferred order of presentation is Title Page, Abstract, Introduction, Materials and Methods, Results, Discussion, Acknowledgments, References, tables, figure legends, and figures.

Submission of a paper to the *Journal of Marine Environmental Engineering* implies that it has not been published or submitted elsewhere. It will also be assumed that the author has obtained all necessary permissions for the paper to include items such as quotations, figures, tables, results of government-sponsored research, etc. Upon acceptance, the publisher acquires the copyright for unlimited world-wide distribution including an electronic format.

Guidelines for the Submission of Text

All submissions should be made as Microsoft Word documents. The manuscript and references should be double-spaced, presented in an easily readable, standard font and size (such as 10 or 12 pt. Times New Roman or Arial). All pages should be numbered. All manuscripts must be submitted in English; American or British spelling may be used.

Title: The title of the paper should clearly indicate the scope and findings of the paper and should provide an accurate indication of the contents when searched by computerized methods. An abbreviated title of a maximum of 35 characters should be provided as well.

Authors: The names of authors should be given in full (first name, initial(s), last name) followed by his or her department, institution and address including postal code and country. The author to whom correspondence should be directed should be indicated in the cover letter. For the corresponding author, telephone and fax numbers and e-mail address should be provided as well.

Abstract: Manuscripts should include an abstract of 150-250 words summarizing the significant findings.

Keywords: Six to twelve keywords or phrases should be supplied to aid in indexing the article.

Text headings: Headings should be set flush left and the text should begin on the next line. For example:

first-level **HEADING** (bold, all caps.)

second-level **Heading** (bold, upper case and lower case characters)

third level Heading: (underscore, upper case and lower case characters)

Tables: Tables should be numbered consecutively and include a clear descriptive caption at the top. Table footnotes should be given a footnote symbol as explained in the Footnotes section, proceeding by row rather than by column order.

References: References should conform to the specifications set forth in the *Publication Manual of the American Psychological Association*. References should be cited in the text by author's last name and publication year (author, year). The full list of references should be collected and typed at the end of the paper in alphabetical order. Cite all authors on each paper; "et al." is not sufficient.

Examples:

JOURNAL ARTICLE:

Last name one, first initial., Last name two, first initial. (year). Title of article. *Journal Title*, volume, pages.

BOOK:

Last name, first initial. (year). *Book Title* (edition). City: Publisher.

STAND-ALONE WEB DOCUMENT

Last name, first initial. (year). *List of authoring systems*. Retrieved date, from <http://www.website.com/>.

Mention of figures and tables within text: When referring to figures, tables and other elements within the text, always call the element by its full name (for example: "See Table 1", "Figure 1 illustrates...", "Refer to Scheme 1"). Do not use ambiguous phraseologies (for example: "1 illustrates...") that do not clearly denote the element being referred to.

Footnotes: Authors are encouraged to minimize the use of footnotes. A footnote may include the designation of a corresponding author of the paper, current address information for an author (if different from that shown in the affiliation), and traditional footnote content. Information concerning grant support of research should appear in a separate Acknowledgments section at the end of the paper, not in a footnote. Acknowledgments of the assistance of colleagues or similar notes of appreciation also properly belong in an Acknowledgments section, not in footnotes.

Footnotes should be indicated in the text by the following symbols: * (asterisk or star), † (dagger), ‡ (double dagger), ¶ (paragraph mark), § (section mark), || (parallels), # (number sign). Do not use numerals for footnote call-outs, as they may be mistaken for bibliographical reference call-outs or exponents. Type each footnote at the bottom of the typescript page on which its text call-out appears. Footnotes within a table should be indicated by the same symbols listed above. Reinitialize symbol sequence within tables. Type footnotes to a table directly beneath the table.

Mathematical Equations: Wherever possible, mathematical equations should be entered in the Microsoft Word document, with unusual or ambiguous symbols identified in the margin where they first occur. Alternatively, equations may be typewritten on a separate page, with their designated positions specified in the text.

Units: Please use S.I. (metric) units. Where useful, inch/pound equivalents may be included in parentheses.

Specifications for the Submission of Figures and Artwork

Figures may be provided as either original high quality hard copies or as separate electronic files.

If supplied as hard copy, photos should be high quality, glossy, original prints of maximum contrast. Line art should be original, camera-ready copy on white paper or clear transparency of a standard for direct reproduction. Film negatives are not acceptable.

Electronic images should be saved as EPS, TIFF, JPEG or BMP files. It is very important that all electronic images be provided as high-resolution files. Photographic images (black & white or color) should be saved at a resolution of 300 dpi minimum. Line art should be saved between 600 and 1200 dpi.

Full captions and photo credits (if necessary) should be provided for each photo and figure. All images should be clearly labeled as to figure number. Top should be indicated if it is not immediately apparent.

Whenever the use of color is an integral part of the research, or where the work is generated in color, the journal will publish the color illustrations as color plates in the back of the issue without charge to the authors. Reprints in color will carry a surcharge. Please write to the Editor for details.

For artwork originally published elsewhere, it is the author's responsibility to obtain written permission to reprint.

Proofs

The corresponding author will receive proofs of the typeset article via e-mail as a PDF file. Please ensure that an e-mail address at which PDF attachment files may be received is provided.

Reprints

The corresponding author will receive a PDF file of the finalized article for free use. Additional reprints may be ordered by completing the appropriate form supplied with the proofs.

Page Charges

There are no page charges to individuals or institutions for contributions to the *Journal of Marine Environmental Engineering*.
