CALL FOR PAPERS

Display and Imaging published studies into the fundamental theoretical understanding of the origins and mechanisms of light emission and absorption; electroluminescence, electroabsorption, photoluminescence, fluorescence, stimulated emission and other electrical or optical phenomena.

Materials: Synthesis and characterization of inorganic, organometallic, organic and polymeric materials showing electronic, optical or nonlinear optical phenomena which would find applicability in display technology and/or imaging. The journal welcomes articles on methods for preparing and evaluating the chemical, physical, electronic, and optical properties of these materials.

Displays: Application of various materials for the realization of electronic displays and characterization of the devices. Study of their stability, efficiency and characteristics.

Imaging: Development of novel materials for imaging applications in material science, biology and medicine. Demonstration of usefulness of various classes of materials and /or improvement of their performance.

The editors of *Display and Imaging* invite your contributions. Notes for contributors can be found at the journal website at: <http://www.oldcitypublishing.com/journals/display-and-imaging-home/d-i-notes-for-contributors/>

SUBSCRIPTIONS

Display and Imaging publishes one volume per year, four issues per volume.

Subscriptions are renewed on an annual basis.

For 2023, Volumes 4, Issues 1-4

Institutional: US \$1190 • EURO €1150 • YEN ¥164,000 **Individual:** US \$233 • EURO €240 • YEN ¥164,000
