OLGA L. BANDMAN

Olga L. Bandman is a Professor in the Supercomputer Software Department, the Institute of Computational Mathematics and Mathematical Geophysics in the Siberian branch of Russian Academy of Sciences. Her earlier investigations focused on fine-grained parallel algorithms synthesis. Currently, she does research in simulation complex phenomena by Cellular Automata. Her primary interest is in asynchronous cellular automata computational properties, especially in using them for simulation of large scale chemical, physical and biological processes with implementation on modern parallel supercomputers.
