

Society News

THE SOCIETY IS GROWING FAST!

ISRS is a multinational, multidisciplinary and lively society that likes to keep in regular touch with its members during the 2 years between congresses.

The Society is delighted to announce that members of the Leksell Gamma Knife Society (LGKS) have now joined the ISRS. We also welcome, as affiliated members, the Latvian Therapeutic Radiology Association (LTRA). Membership numbers now exceed 500 for the first time in the 17 year history of the Society.

ISRS is honoured to receive new clinicians, physicists and researchers working in the SRS field, and hopes the multidisciplinary exchange between them will increase knowledge, stimulate collaboration and advance patient care.

ISRS WEBINAR LECTURE SERIES

Started in October 2016, the Society has implemented a series of webinars as part of its mission to educate and disseminate knowledge and experience. To date, more than 35 webinars on intracranial and body SRS, led by from experts around the world, have been held.

The list of webinars, www.isrsy.org/public/en/courses/webinars/upcoming-webinars/, is continually updated on the Society website. Everybody is welcome to register for this free webinar series. Recordings of previous webinars are available for replay from the members only webpage.

ISRS EDUCATIONAL COURSES

In 2018, several ISRS educational and ISRS-endorsed courses are scheduled in Europe, Asia and other parts of the world.

June 28–30, 2018, Khabarovsk, Russia

ISRS Endorsed Course: *The 9th Educational Course of the Asian Congress of Neurological Surgeons (ACNS)*

August 11–12, 2018, Tianjin, China

ISRS Educational Course: *SRS/SRT in Management of Brain Metastases, Intracranial Gliomas, Eye Pathology, and Head and Neck Cancers & Spine Radiosurgery.*

The list of educational courses, www.isrsy.org/en/courses/training/list, is continually updated on the Society website.

14TH ISRS CONGRESS, RIO DE JANEIRO, BRAZIL, JUNE 9–13, 2019

The ISRS Congress brings together a diverse international community of neurosurgeons, radiation oncologists, medical physicists and other healthcare professionals to encourage communication and interactive networking, as well as allowing the exchange of scientific and research information on the latest developments in radiosurgery.

As the field continues to develop with an increased number of studies, research, and new technologies, the aim of the ISRS is to broaden the scope of this unique international forum and to gather a larger audience interested in extracranial surgery and related topics during the biennial Congress and Exhibition: *Bringing Medical Specialties together under Radiosurgery's Umbrella.*

Watch out for an enticing scientific program that will take place in the unmatched beauty of a major metropolis punctuated by mountains, jungles, ocean, and friendly native people representing cross-cultural groups from all corners of the world.

Prepare to enjoy radiosurgery science and Rio life, June 9–13, 2019!
