

## Society News

### ISRS STATUS AND OUTLOOK

In 2019, ISRS surpassed 800 members and incorporated several affiliate radiosurgery societies.

2020 promises to be another year of growth and evolution as we further our commitment to advancing the field of radiosurgery. Some of our primary objectives for 2020 are: educational initiatives, including courses offered throughout the world and monthly webinars; the publication of additional *Clinical practice guidelines*; collaboration with professional societies from different parts of the world; and increased partnership with corporate sponsors.

Under the leadership of Congress Chairman Matthew Foote, we have started planning the *15th Biennial ISRS Congress*, to be held May 30–June 3, 2021 in Brisbane, Australia.

### CONTINUED FOCUS ON EDUCATION AND EXPERTISE

#### *SBRT for Management of Liver and Pancreatic Cancers*

March 13, 2020  
Milan, Italy

Course Directors: Marta Scorsetti; Laura Fariselli

This ISRS educational course will explore the role of SBRT as part of a multidisciplinary approach in the treatment of these challenging diseases. For further information, please visit our website at: <https://www.humanitasedu.it/event/isrs-educational-course-sbirt-for-the-treatment-of-liver-and-pancreatic-cancer/>.

Additional courses will be offered this year and information will be forthcoming in the next issue.

### ISRS SURVEY

The ISRS, in conjunction with other societies, has created a short survey to elucidate variations in stereotactic radiosurgery training patterns in neurosurgical and radiation oncology programs. Your participation in the online survey will help to identify opportunities for improvement in SRS/SBRT-specific training and education. All data will be analysed in an aggregate and de-identified fashion, and the findings will be reported in future communications. To participate, please visit: <https://survey.sogosurvey.com/r/dp4Seg>.

Thank you in advance for participating in this important survey.

### IRRF MEETING

ISRS endorses the International Radiosurgery Research Foundation (IRRF) on the *4th Biennial Meeting of the IRRF*, to be held June 18–20, 2020, in Long Island, New York. Dedicated exclusively to central nervous system radiosurgery and technology agnostic, the meeting will include practical workshops and robust scientific presentations describing the results of collaborative studies, institutional results and ongoing research.
