CALL FOR PAPERS

High Temperatures – High Pressures (HTHP) is an international journal publishing original peer-reviewed papers devoted to application-oriented, experimental and theoretical studies on thermophysical properties of matter as well as experimental and modeling solutions for applications where control of thermophysical properties is critical. These studies deal with thermodynamic, thermal, and mechanical behaviour of materials, including transport and radiative properties. The journal provides a platform for disseminating knowledge of thermophysical properties, their measurement, their applications, equipment and techniques. HTHP covers the thermophysical properties of gases, liquids, and solids, at all temperatures and under all physical conditions, with special emphasis on matter and applications under extreme conditions such as high temperatures and high pressures. Additionally, HTHP publishes authoritative reviews of advances in thermophysics research, critical compilations of existing data, new technology and industrial applications, and book reviews.

High Temperatures-High Pressures reflects the common interests of physicists, engineers, material scientists, chemists, and other scientists. It provides a focus for developing and disseminating knowledge of thermophysics research, applications, equipment, and techniques. The journal covers the thermophysical properties of gases, liquids, and solids, at all temperatures and under all physical conditions. Additionally, authoritative reviews of advances in thermophysics research, new technology applications, scientific meeting reports, and book reviews are regular features of the journal.

The editors of *High Temperatures-High Pressures* invite your contributions. Notes for contributors can be found at the journal website at: <http://www.oldcitypublishing.com/journals/hthp-home/hthp-notes-for-contributors/>

SUBSCRIPTIONS

High Temperatures-High Pressures publishes one volume per year, six issues per volume.

Subscriptions are renewed on an annual basis.

For 2023, Volumes 52, Issues 1-6

Institutional: US \$1740 • EURO €1683 • YEN ¥240,000 **Individual:** US \$344 • EURO €355 • YEN ¥50,800
