Volume 1, Number 1, 2017

International Journal of Laser Science
FUNDAMENTAL THEORY AND ANALYTICAL METHODS

EDITOR-IN-CHIEF

JONATHAN LAWRENCE

A Study on the Laser Forming of Closed-cell Aluminium Foam Sheets M. HOSEINPOUR GOLLO, M. ADIBSAZADH and A. HOSEIN ROOHI	1
Filtering of Airborne LIDAR Point Cloud with a Method Based on Kernel Density Estimation (KDE) X-G. TAN, L-J. XU, X-L. LI, T. XU and J-X. YAO	21
The Formation of SiC Particulates and the Effects There of on the Microstructural and Mechanical Properties of Laser Surface Treated AISI 304 Stainless Steel N. AL-AQUEELI	39
Laser Cutting of Circular Holes in AISI 304 Stainless Steel Sheet: Heating, Diffusion and Stress Analysis S.S. AKHTAR	51
Iterative Back Projection Reconstruction for Underwater Imaging Y-Z. CHEN, H-Y. TAN, W-L. YANG, Y. YANG, N. HAO and E-C. YANG	87
Mode Selection in Disordered Media by External Magnetic Field H. LIU, L-M. LENG, H-L. MA and S. ZHANG	103
The Influence of CeF ₃ and KPF ₆ in Ultraviolet (UV) Laser Beam Polytetrafluoroethylene (PTFE) Matrix Composites L-Y. WANG, Y. LIU, J. HUANG, W. WANG and Y-X. WU	115

CALL FOR PAPERS

The *International Journal of Laser Science: Fundamental Theory and Analytical Methods* (IJLS) publishes original (primary) research articles, reviews, short communications and letters on all aspects relating to the scientific aspects, fundamental theory and mathematical and analytical analysis methods surrounding lasers, laser beams and laser beam interactions and applications.

Through a rigorous and stringent peer review process *IJLS* aims to give, for the first time, a dedicated platform to collate and disseminate new knowledge to academia and industry alike related to science and fundamental theory relative to lasers. This is extremely important because these topics covered by the *IJLS* are more relevant than ever and so it is a necessity to foster collaboration and extend interest in these areas to ensure that they advance at the required pace.

IJLS provides a readily accessible medium for the rapid reporting of new knowledge and scientific advances in the areas of: the science associated with laser construction, laser beams, laser beam interactions, laser beam processes and laser beam applications; and mathematical modelling and analytical methods for examining laser function, laser beam characteristics, laser beam interactions, laser beam processes and laser beam applications.

Papers relating to the application of lasers in the many different branches of engineering and related disciplines should be submitted to *Lasers in Engineering*, which provides complementary cover in these topic areas to *IJLS*.

The editors of the *IJLS* invite your contributions. Notes for contributors can be found at the journal website at <http://www.oldcitypublishing.com/journals/ijls-home/ijls-notes-for-contributors/>

SUBSCRIPTIONS

International Journal of Laser Science: Fundamental Theory and Analytical Methods publishes one volume per year, six issues per volume.

Subscriptions are renewed on an annual basis.

Volume 4, Issues 1-4

Institutional: \$1225 • €1150 • ¥198,000

Individual: \$240 • €230 • ¥38,800

For more information, visit www.oldcitypublishing.com/journals/ijls-home/

For a sample copy, to subscribe or order back issues, contact:

Old City Publishing
628 North 2nd Street
Philadelphia, PA 19123
USA

tel: +1 215 925 4390 • fax: +1 215 925 4371

Enquiries can also be sent by e-mail to info@oldcitypublishing.com
